

Jonayed Al Habib

Backend Developer — Node.js & Express (TypeScript, in progress)

jonayedalhabibm135@gmail.com | (+88) 01889-377733 | Badda, Dhaka, Bangladesh

[GitHub](#) | [LinkedIn](#) | [LeetCode](#)

Professional Summary

Backend-focused MERN Developer with hands-on, project-based experience designing and deploying RESTful APIs using Node.js, Express.js, and MongoDB. Proven ability to implement JWT (access + refresh) authentication, role-based access control, and versioned API architectures, with AI service integration into production-ready systems. Skilled in relational and non-relational database design across MongoDB and MySQL, including schema modeling and aggregation-based analytics. Currently migrating a video-hosting REST API (EktuDekhi) to TypeScript for stronger type-safety. Strong foundation in Data Structures, Algorithms, and OOP, with a track record of independently managing the full development lifecycle from architecture to deployment.

Technical Skills

Backend: Node.js, Express.js, RESTful APIs, JWT, Socket.IO, TypeScript (Learning)

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Redux, Zustand, Tailwind CSS, Vite

Databases: MongoDB, MySQL

Languages: JavaScript, TypeScript (Learning), Java, C++, Python

Tools: Git, Cloudinary, Postman, VS Code

Fundamentals: Data Structures & Algorithms, OOP, System Design Basics

Projects

EktuDekhi — YouTube-style Video Hosting Backend 2026 (Ongoing — TypeScript migration)
Node.js, Express, MongoDB, JWT, Cloudinary, Mongoose [GitHub](#)

- Architected a versioned REST API (/api/v1) covering videos, comments, likes, subscriptions, tweets, and playlists.
- Implemented dual JWT (access + refresh) authentication with secure cookie handling and bcrypt password hashing.
- Modeled 7+ relational Mongoose schemas with aggregation-based dashboard analytics; currently migrating the codebase to TypeScript.

Interview AI — AI-Powered Interview Preparation Platform 2026
MongoDB, Express.js, React.js, Node.js, Google Gemini API, JWT, Puppeteer [GitHub](#) | [Live](#)

- Architected AI-driven interview report generator producing tailored questions, skill-gap analysis & prep roadmap using Gemini with Zod schema-constrained output.
- Designed secure RESTful APIs with JWT (httpOnly cookies) & server-side token blacklisting for true logout.
- Integrated resume parsing (PDF/DOCX) and AI-tailored resume PDF export via Puppeteer.

MedConnect BD — Telehealth & Emergency Services Platform 2026
MongoDB, Express.js, React.js, Node.js, JWT, Socket.IO, Google Calendar API [GitHub](#)

- Developed a multi-role MERN platform unifying doctor booking, telemedicine, AI-assisted prescription reading, blood-donor matching, and ambulance dispatch for the Bangladesh healthcare context.
- Configured role-based access control for patients, doctors, blood donors, ambulance operators, and admins with secure JWT authentication.
- Designed an ambulance marketplace flow: operator registration, admin approval, availability toggling, and race-safe request acceptance.
- Deployed production-ready on Render with separate frontend and backend services.

Education

University of Information Technology & Sciences (UITS) 2022 – 2026
BSc in Information Technology CGPA: 3.57/4.00

RCCI Public School And College, Rangpur 2019 – 2021
Higher Secondary Certificate (Science) GPA: 5.00/5.00

Leadership & Achievements

Senior Executive, Programming Wing — UITS 2025
• Organizing programming contests and mentoring juniors.

Competitive Programming

- Solved 60+ algorithmic problems on LeetCode.

Certifications

- **Mastering HTML5 and CSS3 (Advanced Level)** — Udemy [View](#)
- **Victory Day Programming Contest 2022** — UITS [View](#)
- **NASA Junior Pilot Program** — NASA [View](#)
